Wherin the variation of boether
is left out, to be declared in the progno-

cause it is suffyciente for one

This yeare shal there be two Colours
one of the Moone, and thother of

it apereth that nothyng passeth the nature of

mynistred vnto you to gette further know-

geue hym contynual prayle and thanks.

In this Prognostication to beginne, I
take my foundation (folowing Ptolomeu

seasons of the yere: winter, & Springe time,
the Sommer and & Haruest, with & Eclipses
of the lightes, and moreouer with the coniu-

with the aspectes and affectyons of & other

after the strongest influence: after & maner of

cendent of the figure Lib: a. The operatiō ther

the most signification, and with them shal per-
ticipate Jupiter and Saturne. After the doc-
tryne of Ptolowew, the sayd operatiō shalbe
most of all accomplished in the regions, Cum-

 being in the house of Mercury, in medio celi,
 in a sygne humayne reasonable, it signifyeth
 among men good estate & wyle ordinaunce,
 aboundaunce of al such things as are necessary
 for man: healthe & prosperitie, in honest vertue
 ous and ryghteous matters, as well concernyng
 y body as y spirit. But because Mercury dothe
 rather moue the spirites & myndes of men,
 then the body, they shall prosper most of al

Throughe the dominacion of Iuppyter &
Mercury in thys Eclipse, suche as be learned
in the lawe, and other shalbe well esteemed, &
prosper in their affaires. The ayre generally

rupsions by Mars & Saturnus engendred,
shal throughe these aspectes come to nought.
Profytable wyndes shal blowe from y^e East

shalbe executed vpon thē, and in lyke maner
vpon other malefactours on the lande. All

This yere some fruyctes are lyke abound
dauntlye to increase, and too be plenteous in
these parties, & also to ware good cheape, spe
cially suche as growe in eares, as rye, wheate
barly. and other also that grow in coddies, but
some swete and fatte fruyctes, necessary for mā
nes sustentation, shall rise in price, & war dere
about the? accustomed rate, as fygges, da
tes, butter, oyle & rayns: wynes shall indiffe
rently prospere & grow, neuertheles they shal
haue

haue somewhat to suffer in ſomer through cer-
tain aspectes, ſo y^e as then they might fortune
to be inhaumed in pryce, hearynges & other
ſiſſhe ſhall fall and be of lower pryce.

¶ Of Diſeaſes.

As touchyng the diſeaſes & maladies wher
with the people might be vexed this yere, I
haue aboue ſufficientlye deſcribed & declared
vnto you, y^e there ſhall come few or none com-
mon dyſeaſes, by the reaſon y^e all ſeaſons of y^e
yere, after theyr natures are ſtable, and tho-
rough y^e Eclipſes and many fortunable aspec-
tes, do become more propitious and fauorable
to the nature of mankynd, excepte the wynter
which before and after Chriſtmas (as I haue
deſcrybed before) ſhall be very noyſible & hy-
derfull to ſuche as are dyſpoſed to catharres.
In the ſpyryng tyme is there nothyng ſuſpect
vnto vs, ſauyng a lyttle thoroushe Mars, in
the ascendent in Leo, whyche threateneth vs
wyth ſodayn dye dyſeaſes. In Sommer and
in harueſt is promiſed vnto vs a fayre paſſage
ſauyng that in October, ſome agues and fea-
uers, myght chaunce to engendre.

¶ Of peace and warre.

I find by Mars retrogarde & other y^e thys
yere in theſe parties ſhal be no warre, no: ſhe-
ding of mens bloud, which neuertheles might
fortune to come to paſſe, in other countreis vn-
der Scorpio, but in theſe parties, as I haue de-
clared before, ſhall many malefactours & euill
diſpoſed

disposed persones receyue punishment, according to iustyce, as well of the sea, as of y^e land.
